

Vsphere web client登陆vcenter server5.5报错

2015年9月15日 11:31

In order for this direct link to work, you must first log in to thevSphere Web Client at least once from <https://{webclient-host}:{webclient-https-port}>

- 1.检查VMware vSphere Web Client服务是否启动
- 2.检查Vmware Virtual Center Management Webservices
- 3.使用administrator@vshpere.local用户登陆

解决方法是：<https://IP地址:9443/vsphere-client>进去后再次<https://ip>地址，就正常了!
